#### Current Adult Literacy Issues

2.8 Million adults with no literacy skills

3.7 Million adults failing to complete primary level

2/3 of adult population (over 23) average years of schooling is 6 years

There are only two levels in national adult literacy/numeracy programs and they are not capable to categorize adult learners according to their abilities and needs.

There is a big gap between the contents of the 1st and 2nd level adult literacy/numeracy programs. Skills of using ICT are not yet considered within the literacy skills

There is a need for a national survey on adult literacy in order to profile the literacy skills of adults. A rescaling in levels of national adult literacy programs is also needed.

Hello my diary!

When I was a child, I couldn't go to school. Because my parents didn't have a marriage certificate and because I did not have an ID-card. Later I got an ID-card but they still didn't allow me to go. They said: "You became taller, there isn't any school uniform for you. When you go to school, who will help your mother?" Thus I couldn't go to school. I really would like to go to school. Now I can read and write. I am so happy!

Merhaba sücrüm!  
Ben on beş yaşındayken  
okula gitmedim çünkü  
annemle babamın evlilik  
cüzdeni almadığı için bizim  
kimliğimiz yoktu ondan  
okula gidemiyordum.  
Sonra oldu göndermediler  
Yok boyun uzadı yok  
Sana göre önlük yok  
annene yardım edecek  
kimse yok diye  
diye beni okula gönder

Thank you!
