DESIGN TIPS & TOOLS FOR ACTIVISTS

**Co-funded by
the European Union**

Funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or the European Education and Culture Executive Agency (EACEA). Neither the European Union nor EACEA can be held responsible for them.

ABOUT THIS WORK

This introductory guide to design and tools for activists was realized and written in October 2023 during the project “Learning from each other in the 'revolution for life' – the contributions of social & political movements to the transformation of society”.

The guide is not meant as a comprehensive resource for the principles of design or available tools. Rather it is meant to help activists improve their outreach by employing simple rules and methods and be inspired to look for available tools online and employ them accordingly.

Everyone looking for support in their activism is welcome to have a look and be inspired!

PREPARATION

WHAT AM I DESIGNING?

The format of the final product determines many important parameters of your design.

WHO DO I WANT TO REACH?

The target group plays an important role in the choice of language, color and many other aspects.

WHAT DO I WANT TO CONVEY?

Content, emotions and values should be specified and weighted against each other.

WHAT IS IT ABOUT?

These questions need to be answered before you start your design!

**OUR BRAIN SORTS AND
ARRANGES ALL STIMULI.**

PERCEPTION

FOCUS POINTS

Our eyes first look for focus points in the design, i.e. headings, contrasts, signal colors

DIRECTION OF PERCEPTION

The information is then taken in (in our culture!) from top left to bottom right.

You will eventually read this (maybe).

THIS IS WHAT YOU WILL READ AT FIRST

Then this line will be brought to your attention.

You will only read this if the eye catching phrases and titles were interesting enough and you are ready to invest in this piece of work. If there are no elements drawing your attention this might seem to much work to read anyway. So I can celebrate that you committed to my work thus far.

**Chances are you
read this before
the paragraph.**

**AN EXAMPLE FOR
DIRECTING THE LINE
OF SIGHT**

LAWS OF PERCEPTION

Law of Proximity

What is close together, belongs together.

Law of Equality

Similar elements belong together.

Law of closure

We close gaps.

Law of continuity

We assume a steady progression.

Law of symmetry

Symmetry is aesthetic, asymmetry often is an eye-catcher.

**WE USE THESE PROCESSES TO
KEEP SOMEONE'S ATTENTION.**

Law of Proximity

What is close together belongs together.

We perceive horizontal lines (green) and perpendicular lines (orange).
There are no lines, but our brain groups the dots together because they are closer together.

Law of Equality

Similar elements belong together.

What do you see?

Three squares
and a circle.

Law of Equality

Similar elements belong together.

What do you see now?

Three yellow squares
and a blue one.

Law of Equality

Similar elements belong together.

And what could
this be?

That's
a blue person.

Our brain looks for patterns
and things it recognizes. The
similarity of elements is one
of its guides.

Law of closure

We close gaps.

Even though there are interruptions of the orange line, we see a star.

Law of continuity

We assume a steady continuation.

Law of continuity

We assume a steady continuation ... as long as there are no other influences.

Well, now it looks as if
A is connected to B.

Law of symmetry

Symmetry is aesthetic, asymmetry often is an eye-catcher.

THE GOLDEN RATIO 1: 1.618

The ratio of the whole to its larger part is equal to the ratio of the larger to the smaller part. This can be used to compose a pleasing image.

RULE OF THIRDS

The rule of thirds involves mentally cutting the image into nine parts. The subject to be photographed is placed at one of the four intersection points, but you can also place it along a line.

COLORS

-  **Color systems**
-  **Colors & emotions**
-  **Color combinations**

Color systems

RGB (32,148,139)

Red-green-blue
mixed for **screens**

HEX (#20948B)

Hexadecimal colors are also based on an RGB
mix where two characters make up one color,
especially used online

CMYK (78,0,6,42)

Cyan-Magenta-Yellow-Key (Black) for **printing**

OTHER COLOR SYSTEMS

Pantone, HSL and HSB (Hue, Saturation,
Lightness and Hue, Saturation, Brightness)...

Color systems

USEFUL RESOURCES

- **CONVERT COLORS**

To switch between color systems, e.g. RGB to CMYK

<https://convertacolor.com/>

- **PICK A COLOR FROM A PICTURE**

Can determine the color of individual pixels from an image

<https://imagecolorpicker.com/>

Colors & emotions

INFORMATION

Colors are information carriers, e.g. RED is established as “stop” or “danger”

Be aware of these aspects:
cultural, political, active & passive colors

Colors & emotions

RED

stop, love, excitement, energy

ORANGE

confidence, warmth, agreeableness

YELLOW

confidence, warmth, cheer

GREEN

nature, freshness, quality

BLUE

peace, loyalty, clean

PINK

sweet, love, kindness

PURPLE

royalty, luxury, ambition

BROWN

simple, dependable, trustworthy

BLACK

sophistication, dramatic, formal

WHITE

innocence, clean, honest

ATTENTION!

Associations with colors change in different cultural regions.

Colors & emotions

You can always look at what others are doing!

ATTENTION!

If you write with one color on top of another, you should check the contrast for readability!

<https://www.siteimprove.com/de/toolkit/color-contrast-checker/>

TYPOGRAPHY

ATTENTION!

Fonts with serifs appear smaller, you should keep that in mind when designing!

A

TYPEFACE & FONT

Typeface refers to a set of characteristics of a font, the specific shape is a font.

AA

SERIF VS SANS SERIF

A serif is a short, thin line on the lines of letters and characters

TYPOGRAPHY

BE AWARE THAT...

- Fonts convey emotions & values

handwriting

Fracture

GRAFFITI

- you should always combine fonts within a font-family or with great contrast, never too similar

Happy Birthday
MY FRIEND!

**HAPPY
BIRTHDAY**
to my friend

ABOUT READABILITY

Don't use too many different typefaces and fonts

Leave enough white space!
No, you don't have "space left"!

Adjust line spacing
Don't make the text too close, but don't let it fall apart either (often 120%, up to 140% ok)

Adapt the text to the medium
Ragged margins online (always!),
justified typesetting in print (usually)

The wrong design can stop people from reading your text.

Don't use too many different typefaces and fonts

WRITING IS GREAT
changing it up is fun
what do you mean this
is hard to read?

DO THIS INSTEAD

Be clear about headlines and paragraphs and have a clean, structured design that guides your readership.

ATTENTION!

This also applies to flyers, posters and banners!

Leave enough white space!

No, you don't have "space left"!

TIP: Full/professional versions are often available at a reduced price or even free of charge for NGOs!

PROGRAMS (ONLINE & DOWNLOAD)

In the area of design, the Adobe Creative Cloud is considered the “industry standard”. NGOs can often get a reduced price on these programs.

However, there are some lists of alternative programs on the Internet that can be cheaper (or free) and are more than sufficient for individual smaller projects!

LAYOUT

3 FINAL TIPS

ONE - ADAPT TEMPLATES

There is no “cheating”, you don’t have to start with a blank slate.

TWO - JUST GET STARTED

At first you can design wildly, then improve your design by applying what you have learned here.

THREE - WHATEVER WORKS!

Don’t believe the snobs - use the programs you can work with, not the ones that are considered the “best”!

**Co-funded by
the European Union**

Funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or the European Education and Culture Executive Agency (EACEA). Neither the European Union nor EACEA can be held responsible for them.
